

SUPPORT PRODUCER RESPONSIBILITY

When **manufacturers** are required to provide responsible, free, convenient **recycling** of their products, they have an incentive to make stuff that's **safer & more sustainable**. Help us make it happen!

Tell Manufacturers:

LESS WASTE,
GREENER, SAFER STUFF!

LET'S MAKE SURE MANUFACTURERS TAKE BACK THEIR STUFF.

Want products that are designed for continual reuse and recycling, and made with fewer toxics? Want more recycling that's convenient and free to use? Then join Zero Waste Washington in calling for more **Producer Responsibility** in our state! This means requiring manufacturers to take responsibility for the full life cycle of their products and packaging.

The first step is getting them to **take it back**. When manufacturers provide and pay for the collection and recycling of their goods, you get convenient recycling services in your community.

EASY, FREE TAKE-BACK

LET'S MAKE SURE THEY RECYCLE IT RIGHT.

Many common products contain toxic chemicals and materials that, if not recycled properly, can be released into the environment, harming families, communities and the planet. The problem is made worse when toxic products are shipped to developing countries for recycling or disposal.

It's vital that manufacturers work with carefully selected processing companies to help ensure that products are responsibly recycled with little or no impact on the environment.

RESPONSIBLE RECYCLING

LET'S ENSURE THAT THEY MAKE IT GREEN.

When manufacturers pay to recycle the products and packaging they make, they have a financial incentive to make it green: designing products that last longer, are more recyclable, and contain fewer toxics that can harm you and your family.

If you agree that expanding **Producer Responsibility** would help make for a better Washington, then it's time to get involved. Tell manufacturers to *take it back, recycle it right, and make it green.*

Learn more... and take action for more recycling and safer, greener products!
